PROFILE

Junior Full-Stack Developer with hands-on experience building real-world web applications using React, TypeScript, Node.js, and MySQL. Strong focus on clean code, practical problem-solving, and scalable solutions. Comfortable working in team-based projects and remote environments.

PROJECTS

Web-app BoolBnb (team 02/2025)

Developed an Airbnb-like web application using React for the frontend and Node.js + Express for the backend.
Designed and implemented advanced search and filtering features.
Contributed to database design and data management using MySQL.
Collaborated in a team environment.

Boolflix (11/2025)

React web app inspired by Netflix, allowing real-time browsing of movies and TV shows, featuring dynamic API fetching, SPA routing, and a responsive layout. Designed to showcase practical skills in React, state management, and modular front-end development.

YogaKounseling (08/2025)

Development of a Kounseling Yoga web app aimed at presenting the company and enabling users to send emails directly to the organization. Built using JavaScript and Tailwind CSS for styling.

EDUCATION

Full-Stack Development Course – Boolean
(09/2024 - 06/2025)

Gained foundational knowledge in programming and hands-on experience with key development tools through theoretical and practical lessons.

University of Siena (2020 - interrupted)
Management Engineering

Relevant subjects: Computer Science Fundamentals, Information Systems

Technical Institute – Electronics and Robotics Diploma (2015-2020)

EXPERIENCE

Social media manager
Giornalismo Libero, remote (08/2022 - 01/2023)

Managed and scheduled digital content for online platforms. Worked remotely with a distributed team.
Developed organizational and communication skills in a digital environment
